Common Home Design Libraries

The Common Home Design Libraries include over 160 commonly used, fully editable parts for drawing new homes or re-modelling projects. These libraries consist of common items that are time consuming and repetitive to draw. They are designed to simply drag and drop onto your plans and can be ungrouped and modified easily. NOTE: These are for use with MacDraft 6.

Dragging & Dropping using the MacDraft Library palette:

When you want to use a symbol or graphic stored in a library in a MacDraft document, you can retrieve items for use by the following:

To drag and drop an item from the library:

1. Click the required item in the library to select it.
2. Holding down the mouse button, drag the item over the MacDraft document window.
3. Release the mouse button.
   A copy of the item will be placed in the MacDraft document.

To drag and drop an item from the library (UNSCALED):

1. Click the required item in the library to select it.
2. Holding down the mouse button, drag the item over the MacDraft document window.
3. Press the Shift key while dragging the item.
4. Release the mouse button.
   An unscaled copy of the item will be placed in the MacDraft document.

To drag and drop an item into the library palette:

1. Select the Library you wish to copy the item to in the Library palette.
2. Select the object or group in the MacDraft document that you want to put into the library.
3. Hold down the Command key.
4. Whilst holding the Command key down, drag the selection to the Library palette window.
